

# SPRINT 1

## **This is the code to create an Chatbot**

```
from chatterbot import ChatBot
from chatterbot.trainers import ListTrainer

# Create a new chat bot named Charlie
robot = ChatBot('FreeBirdsBot')

trainer = ListTrainer(robot)

trainer.train(['Good morning','Good Evening','Good Afternoon','Happy
morning','Happy evening','What is the products','hello'])

while True:
    k = input("You- ")
    response = chatbot.get_response(k)
    print("FreeBirdsBot- ",response)
```
