HOW TO CREATE UI TO INTERACT WITH APPLICATION

STEP 1

STEP 2

STEP 3

STEP 4

```
A 13 45 A V
<com.google.android.material.button.MaterialButton</pre>
                                                            O ↔ 1 %
   android:layout_width="wrap_content"
   android:layout_height="wrap_content"
   android:id="@+id/loginbtn"
                                                                         Sign in
   android:layout_below="@id/password"
   android:text="LOGIN"
   android:backgroundTint="@color/design_default_color_si
   android:layout_centerHorizontal="true"
   android:layout_margin="20dp"
   />
<TextView
   android:layout_width="wrap_content"
   android:layout_height="wrap_content"
   android:id="@+id/forgotpass"
                                                                                         -
   android:layout_below="@id/loginbtn"
                                                                                         +
   android:text="Forgot password?"
   android:textColor="@color/white"
                                                                                         1:1
   android:layout_centerHorizontal="true"
                                                                                         ٢,
```
